# Do You Have Joint Pain But Don't Want Surgery? Now Offering PRP Injections For Joints!

## Platelet Rich Plasma Injections:

We're very excited to announce that we are now offering PRP joint injections! PRP joint injections are extremely effective at minimizing joint pain and actually staving off surgery! Here are some of the amazing benefits:

- Natural procedure that uses a patient's blood to stimulate the body's natural healing process to minimize pain and heal joint related injuries.
- Treated areas: knees, elbows (tennis and golfers), shoulders, wrists (carpal tunnel), achilles tendon, plantar fasciitis.
- Minimal pain and downtime.
- **PRP injections can improve joint function, reduce pain, and delay or even eliminate the need for surgical intervention.**
- These growth factors promote tissue regeneration and repair, reduce inflammation and pain, and improve joint function.

If you would like to learn more about our PRP joint injections, give us a call or text to 661-259-8100. We offer free consultations!
